**Overview:**

Pre-course tasks centre on an introduction to the Global Classroom and WebQuests. They would also serve as a basis for the facilitators to gauge the background of the participants. Registered participants will receive these tasks prior to their arrival in Cardiff; functioning e-mail addresses are therefore of necessity!

The aim of the day will be to encourage participants to consider the theoretical and practical aspects of materials design with a view to marrying theory with practice. The session will also be an opportunity to bridge the gap between paper based materials and online learning without risking alienating participants who are not comfortable with IT:
